

Marketplace Admin Panel

Information Architecture & Navigation Map

Pre-development menu structure, feature placement, and module boundaries

Purpose

This document defines which option belongs under which Admin Panel section before coding begins. Use it as the source of truth for sidebar navigation, routes, page ownership, permissions, and module boundaries.

Final Sidebar Structure and Option Ownership

Dashboard

- Overview — KPIs, charts, alerts, pending approvals, low stock, recent activity.

Catalogue

- Platform Products — admin-owned shared catalogue; product identity, variants, media, specifications, SEO.
- Seller Product Submissions — new seller-exclusive products awaiting review.
- Product Revisions — pending edits to live seller-exclusive products; compare, approve, reject.
- Categories — unlimited nested tree, ordering, SEO, images, archive/restore, attribute assignments.
- Brands — brand details, logo, slug, SEO, active/archive status.
- Attributes — definitions, values, input types, filters, validation, category assignments.
- Seller Listings — seller offers, prices, compare-at prices, listing status.
- Buy Box Monitoring — winning offer, eligible offers, stock and ineligibility reasons.
- Inventory — stock, reserved stock, low stock, movements, authorised adjustments.

Sellers

- All Sellers — profiles, shop data, status, listings, products, orders, documents, activity.
- Seller Approvals — new seller applications; approve, reject, request information.
- Seller Verification — documents, verification state, trust badge.
- Seller Performance — sales, ratings, cancellations, refunds, fulfilment metrics.
- Seller Staff — seller-scoped team members and roles; separate from platform admins.

Customers

- All Customers — profile, status, addresses, orders, reviews, support history.
- Customer Reviews — product/seller review moderation and reports.
- Customer Support History — customer-linked conversations and tickets.

Orders

- All Orders — parent marketplace orders, totals, status, seller split, timeline.
- Seller Orders — per-seller order portions, fulfilment, shipping allocation, commission snapshot, earnings link.
- Payments — provider references, payment events, failures, review.
- Shipments — carriers, tracking, shipment events, delivery status.
- Returns — return requests, reasons, approval and return workflow.
- Refunds — financial reversals, payment reversal, earning/wallet adjustments.

Finance

- Commission Rules — global/category/seller/product rules, priority, schedules.
- Seller Earnings — gross sales, discounts, shipping, commission, net earning, status.
- Seller Wallets — pending, available and withdrawable balances.
- Wallet Transactions — immutable credits, debits, reversals and adjustments.
- Withdrawal Requests — approval/rejection/processing workflow.
- Payouts — completed/failed transfers and provider references.
- Financial Reconciliation — compare orders, payments, earnings, wallets, withdrawals, payouts and refunds.

Marketing

- Coupons — codes, discount rules, limits, schedules, targeting and usage.
- Promotions — sale events and promotional rules.
- Featured Products — homepage/category merchandising and ordering.
- Campaigns — campaign schedules, audiences and linked promotions.

Content

- CMS Pages — About, Terms, Privacy, Help and landing pages; title, slug, excerpt, content, SEO.
- FAQs — questions, answers, ordering and visibility.
- Navigation Menus — header/footer/custom links and ordering.
- Global SEO — title templates, metadata defaults, canonical domain, robots, sitemap.
- Media Library — uploaded files, alt text, metadata and usage.

Support

- Conversations — customer/seller message threads, assignment and internal notes.
- Support Tickets — priority, assignee, status, SLA and resolution.
- Disputes — evidence, decisions and links to refund/order actions.

Reports

- Sales Reports — GMV, net sales, orders, discounts, tax, shipping, refunds.
- Seller Reports — seller sales, earnings, commission and performance.
- Product Reports — revenue, units, returns, refunds, Buy Box performance.
- Customer Reports — growth, retention, spend and activity.
- Inventory Reports — stock, turnover, movements and out-of-stock trends.
- Financial Reports — commission, liabilities, earnings, wallets, withdrawals, payouts, refunds.
- Exports — background export jobs and download history.

Administration

- Admin Users — platform staff accounts, roles, status and activity.
- Roles — role definitions and assignments.
- Permissions — permission catalogue and definitions.
- Notifications — templates, channels, delivery history and failures.
- System Settings — marketplace, currency, locale, tax, shipping, seller/order/withdrawal settings.
- Integration Settings — payment, shipping, email, SMS, storage and analytics integrations.
- Audit Logs — append-only record of sensitive actions.

Important Placement Rules

1. Product identity belongs in Catalogue > Platform Products or the seller submission/revision workflow. Seller price and stock belong to Seller Listings and Inventory.

2. Categories, Brands and Attributes belong under Catalogue because they define catalogue structure.
3. Seller applications belong under Seller Approvals; verification documents belong under Seller Verification.
4. All Orders contains the parent marketplace order; Seller Orders contains each seller's portion.
5. Returns and Refunds are separate: returns are product-return workflows; refunds are financial reversal workflows.
6. Commission Rules, Earnings, Wallets, Withdrawals, Payouts and Reconciliation belong under Finance.
7. Admin Users are platform staff; Seller Staff is a separate seller-scoped module.
8. Global SEO belongs under Content; operational marketplace configuration belongs under Administration > System Settings.
9. Reports are read-only analytics; editing belongs to the operational module that owns the data.
10. Audit Logs are cross-cutting, append-only, and never editable.

Recommended Route Map

Route	Page
/admin	Dashboard
/admin/catalogue/products	Platform Products
/admin/catalogue/product-submissions	Seller Product Submissions
/admin/catalogue/product-revisions	Product Revisions
/admin/catalogue/categories	Categories
/admin/catalogue/brands	Brands
/admin/catalogue/attributes	Attributes
/admin/catalogue/listings	Seller Listings
/admin/catalogue/buy-box	Buy Box
/admin/catalogue/inventory	Inventory
/admin/sellers	All Sellers
/admin/sellers/approvals	Seller Approvals
/admin/sellers/verification	Seller Verification
/admin/sellers/performance	Seller Performance
/admin/sellers/staff	Seller Staff
/admin/customers	Customers
/admin/orders	Orders
/admin/orders/seller-orders	Seller Orders
/admin/orders/payments	Payments
/admin/orders/shipments	Shipments
/admin/orders/returns	Returns
/admin/orders/refunds	Refunds
/admin/finance/commission-rules	Commission Rules
/admin/finance/earnings	Seller Earnings
/admin/finance/wallets	Seller Wallets
/admin/finance/wallet-transactions	Wallet Transactions
/admin/finance/withdrawals	Withdrawals
/admin/finance/payouts	Payouts
/admin/finance/reconciliation	Reconciliation
/admin/marketing/coupons	Coupons
/admin/content/pages	CMS Pages
/admin/content/faqs	FAQs
/admin/content/navigation	Navigation
/admin/content/seo	Global SEO
/admin/content/media	Media
/admin/support/conversations	Conversations
/admin/support/tickets	Tickets
/admin/support/disputes	Disputes
/admin/reports	Reports
/admin/administration/users	Admin Users
/admin/administration/roles	Roles

/admin/administration/permissions	Permissions
/admin/administration/notifications	Notifications
/admin/administration/settings	System Settings
/admin/administration/integrations	Integrations
/admin/administration/audit-logs	Audit Logs

Suggested Development Order

11. Admin shell: authentication, layout, sidebar, shared tables/forms.
12. Real RBAC and server-side permission checks.
13. Catalogue foundation: Categories, Brands, Attributes and Media.
14. Platform Products, Seller Listings, Inventory and Buy Box.
15. Sellers, approvals, verification, submissions and revisions.
16. Orders, payments, shipments, returns and refunds.
17. Finance: commissions, earnings, wallets, withdrawals, payouts and reconciliation.
18. Customers, reviews and support.
19. Marketing and Content.
20. Reports, exports, notifications, settings, integrations and audit-log UI.

Codex Rules

- Inspect the latest Prisma schema before every module; do not invent fields or models.
- Keep business logic in services, not page components or route handlers.
- Enforce permissions server-side for every action.
- Use server-side pagination, filtering and sorting.
- Use transactions for multi-record and financial operations.
- Never mutate wallet balances, earnings, refunds or inventory without dedicated services and immutable records.
- Create audit logs for sensitive actions.
- Use this document for navigation/module boundaries and the detailed SDDs for API/business rules.
